

OneSite® Leasing & Rents Military Housing for Unaccompanied Personnel

OneSite Leasing & Rents Military Housing for Unaccompanied Personnel is a web-based tool used by housing staff and

management to maximize the asset potential of the garrison's housing mission. This simple-to-use, yet powerful, arsenal of tools takes the best commercially available solutions and adapts them to the unique demands of unaccompanied personnel housing (UPH).

Enforce Utilization Policy

The OneSite military housing product helps housing staff quickly determine comprehensive housing availability to maximize occupancy in the quarters. Staff uses the software to set and enforce vacancy thresholds and automatically enforce those policies in the quarters' assignment workflow. The system documents the policy exceptions to ensure that Certificates of Non-Availability (CNA) are issued only when properly justified.

Rapidly Process Resident Management Tasks

With OneSite, housing staff quickly enters and processes new resident information and assigns them to quarters in minimal time. Resident information and history may be easily accessed and management tasks, such as transfers and move-outs, are completed in a few clicks of the mouse.

Accurately Account for Furnishing Assets

The software can also ensure that furnishing assets are signed for and that proper records are retained for inspection. Accountability, responsibility, and inventory are managed through the completely integrated user interface.

Quickly Train Staff and Maximize Productivity

The RealPage software is intuitive and user friendly so your staff will be productive with the tools almost immediately. As staff transitions to new responsibilities, replacement personnel will ramp up quickly, minimizing the impact on work output.

Benefits

CNA Management

Set and enforce occupancy thresholds to ensure that CNA letters are issued only with proper justification. Monitor outstanding CNAs to maximize occupancy potential.

Bulk Move-in / Move-out Operations

Automatically upload large numbers of new residents and rapidly assign them to quarters. Mass move-outs are just as easy. Identify the departing cadre and execute a single operation to out-process the residents from the system.

Furnishings Accountability and Responsibility

Establish an inventory of furnishings assets and systematically document its disposition to the responsible party.

Free Telephone Support

More than 60 technical support professionals are available to answer questions through free telephone support and via chat.

Dynamic Data Reporting

Modify existing standard site reports to meet your unique data and format needs.

Central Reporting

Use the Central Reporting product to create your own custom reports for a single site or your entire portfolio.

24x7 Leasing and Maintenance Contact Center

The CrossFire Contact Center can provide your current and future residents leasing and maintenance support, which integrates directly into the OneSite prospect management and facilities management systems.
