

# Join the OpsTechnology Supplier Network and Profit

*“We have seen a marked increase in compliance with our customers on the Ops system, and the payment cycle is shorter due to electronic invoicing.”*

**– Robin Soehl,**  
vice president marketing  
and business development,  
HD Supply Facilities Maintenance

OpsTechnology offers suppliers a cost-effective way to access thousands of apartment communities, along with an efficient way to conduct business with qualified buyers. For more than a decade OpsTechnology has grown and managed the industry's largest online marketplace, which now includes more than 1,000 industry suppliers and over one million SKUs.

With OpsMerchant solution, all transactions, including inquiries, orders, and invoices are managed online to save time, reduce errors, and make it easy for you to do business with your customers. All that's needed is an Internet connection to work with customers through the OpsTechnology solution.

to find out more about OpsTechnology.

How much business are you missing out on by not being an OpsTechnology supplier? Join the network and leverage technology to drive your business with:

#### **Online Catalog Management**

Our team maintains custom online catalogs for your customers that include only their approved vendors and contracted pricing. This works to ensure that the agreements that you negotiate with your customers are fulfilled, and that you remain a preferred supplier when there is staff turnover at a property.

#### **Online Ordering**

Reap the benefits of online ordering without the cost of creating and maintaining a web site. Orders are received online so you can check and confirm them before the work is done. The entire sales order process is automated to improve accuracy, reduce fulfillment time, and increase on-time delivery.

#### **Online Invoicing**

Electronic invoicing eliminates printing of paper invoices, postage costs, and time spent correcting errors and tracking down missing payments. You save money and get paid faster. Invoices can be submitted online or in EDI or XML format.

#### **Manage Bids and Projects Online**

OpsTechnology also enables suppliers to receive RFPs and send bids, quotes, and proposals through the OpsBid solution. All project documents can be stored and shared online. And if you're looking for projects to bid, we can help you with that, too.

#### **Find Projects for Bid**

Sign up to receive automatic notification of bid opportunities in your area and browse the open bids posted by property managers at the OpsCommunity web site. Online bidding, job award notification, and even online project management make this a streamlined and cost-effective way to do business.
