

# Implementation Consulting Service

To achieve rapid ROI, your spend management system must be set up according to your business needs. Our Implementation Consultants bring their experience and learning from thousands of OpsTechnology deployments. They provide the strategy, technical expertise, best practices, and training you need for better results, faster – right from the start.

## Benefits:

Implementation consulting is required for all new OpsTechnology deployments, to ensure optimum application set up, on-time deployment, and training for rapid adoption across your properties. We'll make sure it's right the first time.

## Services Provided:

- Participation in on-site meeting to plan deployment and gather data
- Application configuration based on your business processes and best practices
- Site demo and integrations testing
- User application training and documentation
- Success metrics documentation for benchmarking savings
- Settings modifications for further optimization
- Spend Management Advisory Service for six months from the date the first site is deployed.
