Offer the Fast, Secure Community-Wide Wi-Fi Residents Want.

Traditional single-family broadband solutions deployed in most apartment buildings today are costly to your resident and are limited to in-unit Wi-Fi. With Whitesky, RealPage® now offers managed High-Speed Internet Access (HSIA). Smart Wi-Fi offers the industry's only cost-effective alternative to traditional carriers and Internet Service Providers (ISPs) empowering properties to become their own providers. As the connecting thread for smart building design, Smart Wi-Fi allows for "always on" capabilities for personal area network use, a guest network for common areas, and seamless access for on-site leasing managers and maintenance to fulfill on-demand requests.

SMART WI-FI™ whitesky ENABLED

- **Purer Bandwidth -** Property controlled internet provides higher quality service
- **Accommodating -** Each unit is set-up with its own network (VLAN) for security and privacy
- **High Speed -** Property-wide coverage with up to 1 Gbps for wired connections and up to 200 Mbps for wireless
- **Accessible -** Instant activation upon move-in with pre-installed Wi-Fi
- **Reliable -** No dead spots or latency issues from Sidewalk to Sofa™

Properties see

$15-20

and more per unit per month with the Wi-Fi solution.

SAY GOODBYE TO:

- Poor resident experience and support

- Expensive technology without revenue share

- Regional limitations and manufacturers' hardware requirements

- Long term contracts with traditional Internet Service Providers

AND HELLO TO:

Our Smart Wi-Fi solutions are available for both retrofit and new developments—working seamlessly at any stage of your development to enable efficient, cost-effective deployments. With sub-18-month returns on investment, a managed HSIA solution can support almost every on-site technology solution available today.

SMART WI-FI™ SOLUTION INCLUDES:

✚ Network infrastructure including firewall, Unified Security Gateway (USG), routers and switches strategically placed in secure locations for optimal network installation

✚ Wired property-wide network installation (CAT 6)

✚ New in-unit Wireless Access Points

100% of investment recovery is possible in less than two years.

With **Whitesky**, RealPage offers a nationwide network to deliver faster, more reliable managed bulk Internet service at a lower cost. Find out how Smart Wi-Fi can make a significant difference at your properties today.
